

样品

The diagram illustrates the optical path of a monochromator. It begins with a '样品' (Sample) box at the top left. A vertical red dotted line descends from the sample, passing through a '凸透镜' (Convex lens) box. Below the lens, the line passes through a '狭缝' (Slit) box, which is a small rectangle. Finally, the line enters a large box labeled '单色仪' (Monochromator) at the bottom right.
